

Quality Policy

Newell Roofing Products Ltd manufactures a range of profile sheeting, decking products, purlins, flashing and ancillary products for the construction and agriculture sectors. We provide a range of other complementary products such as rain wear products, fasteners, single-ply membranes and PLX sheeting.

The company is committed to the provision of quality products that conforms to international standards, our own and customer requirements. Our products are manufactured under an approved factory controlled system (FPC) which conforms to the requirements of EN1090. These products are CE marked and our FPC system is accredited by SCCS.

To ensure that quality goals are achieved and adhered to, the company has developed and implemented a documented quality system which conforms to the requirements of IS EN ISO 9001. The quality system covers all areas of our business.

The quality system has been explained to and is understood by all employees who are responsible for ensuring that it is fully implemented throughout the organization. All levels within the company understand the importance of customer satisfaction and the company has established a methodology of monitoring and implementing improvements.

The effectiveness of the system is monitored and improved through the application of an internal audit program, management reviews and the ongoing improvement of our products and processes. Management has established a framework for setting and reviewing quality objectives. The company ensures it has the resources, support and training to maintain the features of this policy.

All employees are responsible for the consistent application of this quality policy and for ensuring that defects, deviations or improvements are promptly identified and reported to the appropriate level of management.
